

Get all the benefits...
 miniBOOSTER Hydraulics offers a comprehensive range of hydraulic pressure boosters which are used worldwide in a variety of applications. There are several major advantages in using hydraulic boosters from miniBOOSTER Hydraulics.

Minimum size

The compact size of the miniBOOSTER allows installation at any point where high pressure is needed. They are easily incorporated in existing or new systems.

Maximum power

High pressure can be achieved by using inexpensive low pressure components. Pressure up to 2,000 bar can be obtained from any low pressure hydraulic power source.
